

# PROJECT PROFILE

## Grange Road Park

Keystone Consulting Engineers, Inc. (KCE) provides engineering services to twenty-eight municipalities. KCE has provided park planning, design and construction management for many parks and recreation facilities, including trail systems and both passive and active recreation parks.

One such park under development is the Grange Road Park in Upper Macungie Township (Lehigh County, PA). The park is founded on agricultural land acquired by the Township and is being developed in stages. As with all of our recreation planning and design projects, KCE worked closely with the Township and community groups to develop the plan for the Grange Road Park.

KCE obtains all required environmental permits, assists the community in obtaining grant funding, and coordinates the design and construction of ancillary facilities such as community centers, bathroom and concession buildings, and picnic pavilions.
